

EUCARAY® Radiating Cables

EUCARAY® RMC 12-CL

1/2" radiating cable optimized for applications at 2.4 GHz such as WLAN.

Radiating Cables

Eupen EUCARAY[®] radiating cables have been developed to provide RF-coverage for wireless applications in confined areas. They provide homogeneous and continuous RF-coverage, and allow simultaneous transmission of multiple wireless services. EUCARAY[®] radiating cables are engineered and produced in Belgium to highest quality standards for best performance and longest lifetime.

Product Description

The EUCARAY[®] RMC 12-CL is a radiating cable best performing at 2.4 GHz, e.g. to be used with WLAN inside buildings, tunnels, rail and production environment. The size of 1/2" features low weight and low bending radius.

Ordering Information

Ordering name: RMC 12-CL-HLFR

Recommended connectors and cable preparation tool:

- 7-16 / 4.3-10 Type: 716FR12; 43FR12
- N Type: <u>NF50R12; NM50R12</u>
- Tool: <u>SPTC50R12</u>

*) EUCARAY[®] achieves low coupling losses due to the patented slot design. Resonant frequencies are narrow-band VSWR peaks that usually occur in non-used bands of the radio-spectrum. Their amplitude generally decreases the higher the order.
